

**The Acting Returning Officers Report**

**Proposed change of Polling Places for future elections – statutory report of polling stations that I would be minded to select**

For proposed polling district WR1, I would be able to hold the poll within the existing building, Boyle House, as that would remain suitable even with the additional number of electors.

The current WR9 which would become WR3 would change name but remain at the same approximate location. As the actual part of the building I have previously selected as a polling station is no longer in the same condition due to renovation and potential reconfiguration I would, at the relevant time to decide, choose an accessible room within the Greenwich Heritage building complex.

The polling station that I would be minded to select for the proposals for WR2, 7 and 8 would not change from the current position as they are suitable for the changed number of electors.

John Comber  
(Acting) Returning Officer, Royal Borough of Greenwich  
Town Hall
